The AutoCAD Product Key drawing is only displayed on a computer monitor or screen, and this display is updated in real-time while the drafting is being performed. At any point in the design process, the user can freeze the display (turn off the animation) to review and edit the drawing without affecting the other actions. AutoCAD (the full name of this program is AutoCAD LT) is a versatile, feature-rich 2D and 3D drafting and designing software. Although released in 1984, the current version is 2016, and was introduced in 1993 (AutoCAD Release 3), and is constantly updated by Autodesk. AutoCAD allows the user to create and modify drawings easily, and an unlimited number of drawings can be created in the program. The capability of AutoCAD to create drawings, documents and to work with electronic and paper documents allows it to be used as a tool in any project, regardless of the size or complexity. Windows AutoCAD programming AutoCAD R14 was the first version of AutoCAD that supported programming. Visual LISP Visual LISP is a scripting language written in AutoCAD. It provides for object oriented programming in AutoCAD, which makes it easy to program. The syntax of Visual LISP is similar to the AutoLISP language. However, Visual LISP allows access to ActiveX controls that makes programming with the two languages comparable in some respects. Visual LISP is available for AutoCAD 2009, AutoCAD 2010, AutoCAD LT, and AutoCAD 2013. Visual LISP is used to automate drawing tasks. A typical use for Visual LISP is to generate drawings by command line for a network of AutoCAD documents. Another common use is to generate a drawing by command line from another application that writes data to the drawing. Visual LISP is not supported in AutoCAD 2012. AutoCAD R14 introduced "Coder" objects that allow access to the other programming environments, such as Visual LISP, and .NET. AutoCAD R15, introduced the "LanguageManual". Although this class has no direct use in the scripting environment, it has been adopted by other products, such as SnapLine, as a programming-related class. Visual LISP For Visual LISP programming, the following basic syntax was available for AutoCAD 2015: INCLUDE = R15.lsp BEGIN = EXEC(R15.lsp) MAKESYM(MacroName) CURRENTSYMBYMacroName(label1, label2) CURREXT(x1, y1, x2, y2) CURREXT(x1, y1, x2, y2) ADDSTONE(label1, label2, angle, element) CREATESTONE(label1, label2, angle, element) DELETETESTONE(label1, label2) DELETEELEMENT(label1, label2 ca3bfb1094
