1. Field of the Invention The present invention relates to compositions comprising a silver halide host and at least one dye, and also to a photographic element comprising a silver halide photographic layer on a support

comprising a polymer latex of which at least one part has been grafted with a vinyl monomer of the type of a polyacrylate. 2. Description of the Related Art While the photographic processing for the dye images obtained by silver halide photography is used all the time, it is not exempt from friction and wear. Without wishing to be bound to any particular theory, this results in the appearance of
